Mabru's 12V DC RV Air Conditioner: Part of Fundraising Raffle at Peace Love Vans Festival

by Myranda Goben

Dale City, FL, March 2026 — Mabru proudly supported the annual Peace Love & Vans Florida festival for the second consecutive year by contributing its 12V DC RV rooftop air conditioning unit for the event's raffle, hosted by Vanlife Outfitters. The raffle ticket sales support a vanlife non-profit called [Together We Van](#).

Held at **Withlacoochee River Park**, the Peace Love & Vans festival brings together vanlife enthusiasts, builders, and outdoor adventurers for a multi-day event centered around community, education, and off-grid living. Attendees enjoy workshops, live music, vendor showcases, and opportunities to connect with like-minded people who are passionate about life on the road.

As a leader in battery-powered climate control, Mabru's mission aligns perfectly with the event's focus on self-sufficient, mobile lifestyles.

"To provide boat owners, RV enthusiasts, and off-grid adventurers with innovative and reliable climate solutions that enhance comfort, efficiency, and enjoyment — on the water, on the road, and beyond." - Mabru's Mission Statement

Congratulations to this year's raffle winners, John and Paula. They turned a \$1 raffle ticket into nearly \$3,000, walking away with "the coolest prize in the raffle". The couple is preparing for an upcoming road trip through New England, eventually making their way down to Key West, Florida. Now, they are equipped with reliable, battery-powered cooling for their journey courtesy of Mabru and Peace Love Vans.

Built on years of marine HVAC expertise, Mabru's 12V DC RV rooftop air conditioners bring true comfort to life on the road. Designed for quiet operation and maximum efficiency, these units deliver a powerful 12,000 BTUs of cooling capacity wherever your travels take you— no generator or shore power required.

Mabru's RV air conditioner is designed to deliver effective cooling for full-cabin comfort while operating directly on battery power. Unlike many traditional systems, it does not require an inverter, making it an ideal solution for off-grid applications where energy efficiency and system simplicity are critical.

"I have one in my personal van, and it keeps me cool even in the Sunshine State's scorching heat."
- Josh Theberge (Vanlife Outfitters Co-Founder)

By supporting events like Peace Love & Vans, Mabru continues to connect directly with the vanlife and RV communities, demonstrating how battery-powered HVAC solutions enable more efficient, comfortable, and independent travel. Experience the same innovation trusted by boaters worldwide, made for adventurers who call the open road home.
