

Elevate your
comfort and control
with our innovative
WiFi Module

MABRU WiFi MODULE

Remote Access Climate Control

The Mabru WiFi Module enables Internet connectivity to your boat's Mabru air conditioning system.

Check the temperature of a cabin directly from your smartphone. Then effortlessly switch between cooling, heating, and fan-only modes to customize your cabin's climate and airflow preferences.

Key Features

Network

The Mabru WiFi Module supports a 2.4 GHz signal that allows you to control your air conditioning unit from anywhere.

Connectivity

The Mabru WiFi Module enables tailored control of each individually connected Mabru air conditioning unit. For simplified control across your vessel, multiple units, each equipped with a module, can be grouped within the app.

Internet of Things

The Smart Living App works with **Google Home** and **Amazon Alexa**, allowing voice control and centralized management of all your air conditioner units, along with other compatible smart devices across your vessel.

Power

The Mabru WiFi Module connects directly to Mabru air conditioning units- no additional power supply required.

User Experience

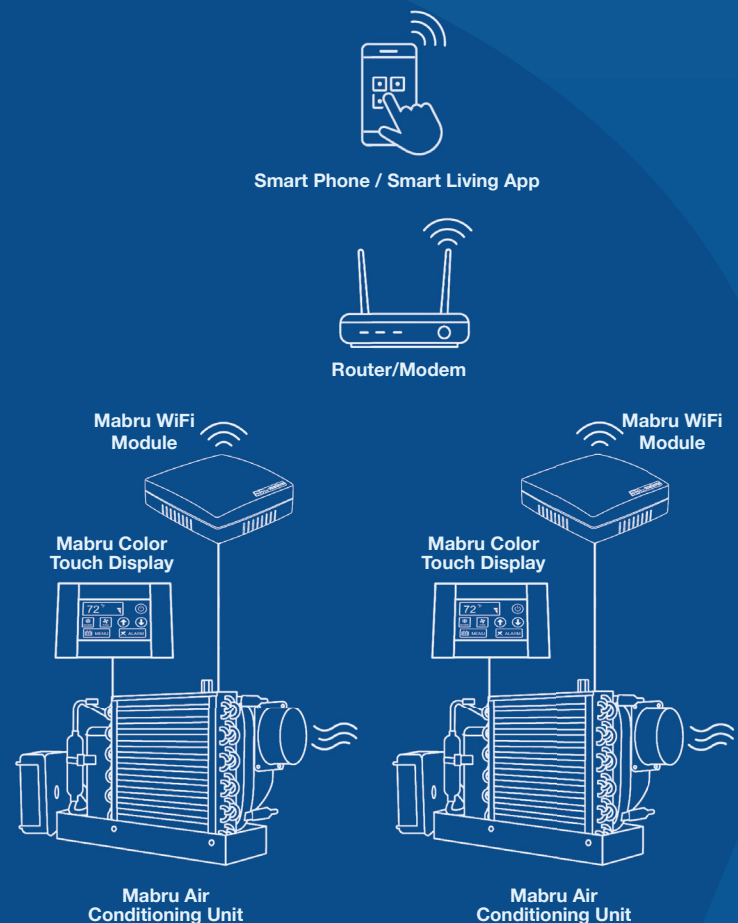

Manage your air conditioning unit(s) using the SmartLife - Smart Living App.

Control

Schedule start and stop times or select auto-mode that uses a temperature setting for ultimate convenience to optimize energy use and maximize comfort.
